documenting software architectures in an agile world - cmu/sei-2003-tn-023 1 1 introduction this report is the fifth in a series on documenting software architectures.1 the software engineering institute (sei sm)2 has developed a comprehensive approach to capturing architectural design decisions, loosely called the views and beyond (v&b) approach. **documenting software architectures: organization of ...** - the theme of the report is that documenting an architecture entails documenting the set of relevant views of that architecture, and then completing the picture by documenting information that transcends any single view. the audience for documenting software architectures is the **software architecture documentation in the real world** - documenting software architectures architecture/system categories - focus • small, ad-hoc systems typically developed by small teams • large systems, that are developed by larger teams, typically long-lived, strategic • product lines & platforms, i.e. base architectures on top of which a family of systems is built often by several **documenting software architectures - with respect to documenting architectures, a working group created what became ansi/ieee-1471-2000 ("ieee 1471"), a recommended best practice for documenting the architectures of software intensive systems [6]. even while benefiting from this welcome attention, however, practitioners are still left with a void. uml and **documenting software architectures views and beyond 2nd ...** -
