## Documenting Software Architectures Views And Beyond 2nd

**documenting software architectures in an agile world** - cmu/sei-2003-tn-023 1 1 introduction this report is the fifth in a series on documenting software architectures.1 the software engineering institute (sei sm)2 has developed a comprehensive approach to capturing architectural design decisions, loosely called the views and beyond (v&b) approach. **documenting software architectures: views and beyond** - documenting software architectures: views and beyond paul clements\*, david garlan\*\*, reed little\*, robert nord\*, judith stafford\* carnegie mellon university pittsburgh, pennsylvania 15213 usa ... **documenting software architectures: organization of ...** - the theme of the report is that documenting an architecture entails documenting the set of rel-evant views of that architecture, and then completing the picture by documenting information that transcends any single view. the audience for documenting software architectures is the **documenting software architectures - the-eye** - entire system -- all of these are important aspects to capture when documenting a software architecture. we haven't learned how to document beauty and grace yet, but for that we substitute the documentation of rationale **a practical method for documenting software architectures** - with respect to documenting architectures, a working group created what became ansi/ieee-1471-2000 ("ieee 1471"), a recommended best practice for documenting the architectures of software intensive systems [6]. even while benefiting from this welcome attention, however, practitioners are still left with a void. **uml and documenting software architectures using uml** - documenting software architectures using uml • 10:81 choosing between these two strategies may rely more on the semantic match offered by them, since both have nearly the same expressiveness, and are visually nearly identical. one thing which can influence the decision is a way in which connectors are documented. **software architecture documentation in the real world** - documenting software architectures architecture/system categories - focus • small, ad-hoc systems typically developed by small teams • large systems, that are developed by larger teams, typically long-lived, strategic • product lines & platforms, i.e. base architectures on top of which a family of systems is built often by several **a pattern language for documenting software architectures** - 4 a pattern language for documenting software architectures figure 1 depicts a map of the pattern language as well as the most important relationships between the proposed patterns. this pattern language attempts to tackle the complex problem of documenting software architectures and the intended audience for the language is software architects. **a template for documenting software and firmware architectures** - a template for documenting software and firmware architectures version 1.3, 15-mar-00 michael a. ogush, derek coleman, dorothea beringer hewlett-packard product generation solutions mike\_ogush@hp derek\_coleman@hp dorothea\_beringer@hp abstract this paper defines a template for producing architectural documentation. two different kinds of **library of congress cataloging-in-publication data** - prologue: software architectures and documentation 1 the prologue establishes the necessary concepts and vocabulary for the remainder of the book. it discusses how software architecture documentation is used and why it is important. it defines the concepts that provide the foundation of the book's approach to documentation. it also **software architecture - crectirupati** - documenting software architectures: use of architectural documentation, views, choosing the relevant views, documenting a view, documentation across views. reconstructing software architecture: introduction, information extraction, database construction, view fusion, and reconstruction.
