relativity: the special and general theory - biblio - of einstein's theories date back to this period. amongst these may be mentioned: the special theory of relativity, inertia of energy, theory of the brownian movement, and the quantum-law of the emission and absorption of light (1905). these were followed some years later by the **the general theory of relativity - christopher monroe** - minimum of postulates is a better theory (since there are less assumptions involved in its construction); from this point of view the general theory of relativity is a gem 3. the completed formulation of the general theory of relativity was published in 1916 (fig. 7.2). figure 7.2: einstein's general theory of relativity paper. **einstein's theory of gravity - arxiv** - einstein's theory of gravity anzhong wang * casper, physics department, p.o. box 97316, baylor university, waco, tx76798-7316 department of physics, university of illinois at urbana-champaign, 1110 west green street, urbana, il61801-3080 (september 4, 2018) four-dimensional cylindrically symmetric spacetimes with homothetic self-similarity ... **einstein's bogus deflection of starlight by the sun's ...** - einstein's otherwise counter intuitive equivalence principle could be considered as a possible fundamental constant of nature. prior to this experimental result, all of the gravity theories had either predicted this effect or had a ready explanation for it. however, einstein's theory was set apart from the other theories **einstein's general theory of relativity** - einstein's general theory of relativity Øyvind grln and sigbjørn hervik. contents preface xv notation xvii i introduction: newtonian physics and special relativity 1 ... 8 einstein's field equations 177 8.1 deduction of einstein's vacuum field equations from hilbert's **albert einstein - marxists internet archive** - albert einstein 5 preface (december, 1916) the present book is intended, as far as possible, to give an exact insight into the theory of relativity to those readers who, from a general scientific and philosophical point of view, **einstein's theories of relativity** - einstein's first paper on special relativity, in 1905, dealt exclusively with inertial reference frames. ten years later, einstein published a more encompassing theory of general relativity that considered accelerated motion and its connection to gravity. this class only the theory of special relativity.
